1. Область применения, цели и задачи фонда оценочных средств

Фонд оценочных средств (ФОС) является неотъемлемой частью рабочей программы дисциплины **Иностранный язык** и предназначен для контроля и оценки образовательных достижений обучающихся, освоивших программу данной дисциплины.

Целью фонда оценочных средств является установление соответствия уровня подготовки обучающихся требованиям ФГОС ВО по научной специальности 2.5.6 **Технология машиностроения**

Рабочей программой дисциплины Иностранный язык предусмотрено формирование следующих универсальных компетенций:
- готовность участвовать в работе российских и международных исследовательских коллективов по решению научных и научно-образовательных задач.
- готовность использовать современные методы и технологии научной коммуникации на государственном и иностранном языках.

В результате освоения дисциплины обучающийся должен:

**Знать:**
- базовую лексику общего языка и терминологию своей специальности.

**Уметь:**
- читать на иностранном языке художественную и научную литературу и тексты общественно-политического и делового характера, переводить тексты по специальности со словарем;
- вести беседу на профессиональные и бытовые темы;
- подготовить письменное и устное сообщение на профессионально-ориентированную тему (доклад, статья).

**Владеть:**
- лексикой по бытовой и специальной тематике и речевым формулам для стандартных ситуаций общения;
- методикой самостоятельной работы над совершенствованием своих умений и навыков чтения, восприятия иностранной речи на слух, говорения, реферирования и аннотирования.

ЗАЧЁТНАЯ КОНТРОЛЬНАЯ РАБОТА

Task 1: Give a written interpretation in Russian:

GLOBALIZATION

The word “globalization” stirs powerful emotions. Some see it as highly beneficial – a key to future world economic development, more opportunities and higher living standards across the world. Others see it as a malign force that increases inequality within and between nations, disempowers the weak, threatens employment and living standards, and increase poverty. Most people agree that the forces driving globalization – technological change, lower communication and transport costs, increased trade and financial integration among countries - are powerful. But they need to be harnessed to make globalization work for the good of all. Clearly the gap between rich and poor is too wide and may even be widening. Today’s central development challenges are to improve the lives and prospects for the nearly three billion people now living in poverty. Only if the economies in which they live grow faster, can the lives of this enormous group of people be improved. Globalization can contribute to this faster growth. But it also increases the need for stronger policies at the national level. And it means that the international community must adapt the way in which it assists poor countries. Globalization is no longer an abstraction but a stark reality that virtually all firms, large and a small, face. Firms that want to survive in the 21st century must confront this all encompassing force that pervades every aspect of business. In a wide range of industries from automobiles to food and clothing, firms face the pressures of global competition at homes as well as in international markets is no longer an option. All firms, regardless of their size, have to craft strategies in the broader context of world markets to anticipate, respond and adapt to the changing configuration of these markets. Technology is rapidly altering the nature of competition and strategy in many industries. Then global proliferation of relatively inexpensive computing power and global linkages of computer networks through telecommunications have resulted in an information-rich, computation-rich and communication-rich organizational environment. Telecommunications and computer networks are changing the way in which managers work and interact, providing links between country-centered organizations, and permitting technology to be rapidly shared and learning transferred throughout the organization. As a result, speed of technological diffusion and change is rapidly increasing. At the same time, the growing technological orientation of many industries and use of computers and telecommunications technology have created greater knowledge intensity and dependency. Competition is also intensifying, as globalization changes the boundaries of competition and new sources of competition emerge. The basis for competition is also changing, as new players are able to enter the market with an ease unknown even ten years ago. Information technology has dramatically transformed the costs of doing business and enabled firms to bypass stages in the value chain, for example, going directly to customers, or outsourcing functions and operations. Such factors have changed the nature of the value chain in many industries, enabling new and non-traditional competitors to enter the market rapidly and compete effectively.

Task 2: Answer the questions and be ready to discuss the problems noted in them:
1. What does the notion “globalization” imply according to your vision?
2. Why do some people see globalization as a key to higher living standards across the world and others see it as the malign force that increases inequality and threatens living standards? What’s your own opinion?
3. How many people are now living in property: a) 500 million; b) 3 billion; c) 1 billion
4. Why is the gap between rich and poor widening?
5. What is the role of international financial institutions – IMF and the World Bank – in the poverty reduction strategies?

Task 3: Read the international words and guess their meaning:
organize, organization, well-organized, leading, leader, leadership, professional, theory, theoretical, practice, practical, invest, investor, investment, finance, financial, financier, business, businessman, situation.

Task 4: Translate into Russian:
1. They need to be harnessed to make globalization work for the good of all.
2. It means that the international community must adapt the way in which it assists poor countries.
3. Globalization is no longer an abstraction but a stark reality that virtually all firms, large and a small, face.
4. Telecommunications and computer networks are changing the way in which managers work and interact.
5. Competition is also intensifying, as globalization changes the boundaries of competition and new sources of competition emerge.

Task 5: Give English equivalents to the following:
по всему миру; внутри и между нациями; уровень жизни; может внести вклад; это означает, что; все стороны бизнеса; так же как; больше не; обеспечивая связи; как результат

Task 6: Translate into English:
1. Расстояние между бедными и богатыми очень большое и с каждым годом всё больше увеличивается.
2. Технологии с огромной скоростью меняют характер конкурентий и стратегий во многих отраслях промышленности.
3. Некоторые рассматривают «глобализацию» как ключ к будущему развитию мировой экономики и более высокому уровню жизни.
4. Надо сделать так, чтобы глобализация работала на всеобщее благо.
5. Глобализация больше не абстрактное понятие, а реальная действительность.
